

“New Age Glass fulfills the worldwide growing need of ecologically oriented productions and products”.

Nature is happy ...

HEINZ GLAS

16

22

HEINZ-GLAS has achieved a technological breakthrough and offers now recycling glass. This new glass is called “HEINZ New Age Glass”. The main advantage is particularly the glass melting process nearly 100% CO²-free!

Further advantages are:

Heinz New Age Glass is melted to 100% from glass cullets.

CO² is reduced by approx. 90% compared to conventional melting process.

Only 10% of CO² is emitted in the further process chain.

The glass can be endlessly often re-melted.

The energy can be supplied by renewable energy sources (no atomic energy, no fossil energy sources).

The hydrolytic class 3 is guaranteed.
